DETAILED ACTION

Information Disclosure Statement

The information disclosure statements filed on 4/27/2006, 11/25/2009 and 4/12/2010 have been considered.

Drawings

The drawings were received on 9/23/2009. These drawings are acceptable.

Oath/Declaration

The declaration under rule 132 received on 4/27/2006 has been considered.

Allowable Subject Matter

Claims 1-14 are allowed.

Reasons for Allowance

Claims 1-14 are allowed since there is no prior art of record that teaches or suggests a thin film diode array panel comprising a relationship of various elements as claimed with the specific allowable subject matter cited in the following claims:

Claim 1:

- an insulating layer formed on the first and second floating electrodes

Art Unit: 2871

- wherein the insulating layer is interposed between the first input electrode and the first floating electrode, and further wherein the insulating layer entirely covers lateral surfaces of the first floating electrode
- wherein the insulating layer is interposed between the second input electrode and the second floating electrode and further wherein the insulating layer entirely covers lateral surfaces of the second floating electrode
- a pixel electrode including a first contact electrode overlapping the first floating electrode where the insulating layer is interposed between the first contact electrode and the first floating electrode, a second contact electrode overlapping the second floating electrode where the insulating layer is interposed between the second contact electrode and the second floating electrode

Claim 8:

- an insulating layer formed on the first and second input electrodes and the first and second contact electrodes
- a first floating electrode formed on the insulating layer and overlapping the first input electrode and the first contact electrode
- a second floating electrode formed on the insulating layer and overlapping the second input electrode and the second contact electrode
- a pixel electrode connected to the first and second contact electrodes

Claims 2-7 are allowed since they depend on the allowed claim 1.

Art Unit: 2871

Claims 9-14 are allowed since they depend on the allowed claim 8.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Den Boer et al (US 6243062) disclose an active matrix liquid crystal display wherein each pixel included a dual metal-insulator-metal (MIM) diode. Den Boer et al's MIM diode is different from claimed invention as it lacks a floating electrode, and it has an input electrode and a contact electrode formed on different layer levels.

Maeda et al (EP 447077) disclose an electro-optical device wherein each pixel included a dual MIM diode; wherein each MIM diode has an input electrode overlapped with a contact electrode of a pixel electrode. Maeda et al's device also lacks a floating electrode, and it has the input electrode and the contact electrode formed on different layer levels.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
